

Country-scale effects of recovered lithium allocation objectives

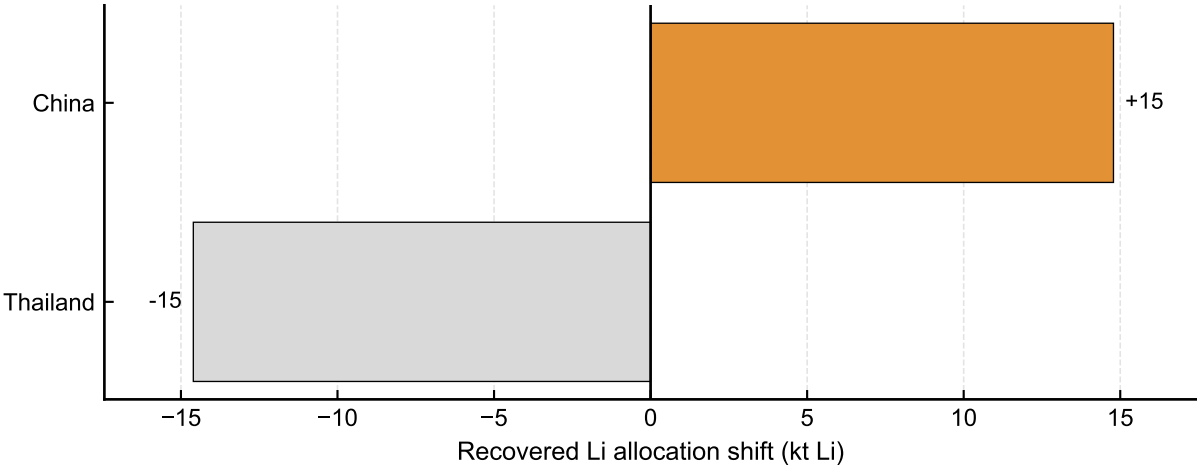

A. National allocation patterns reveal where recovered Li goes

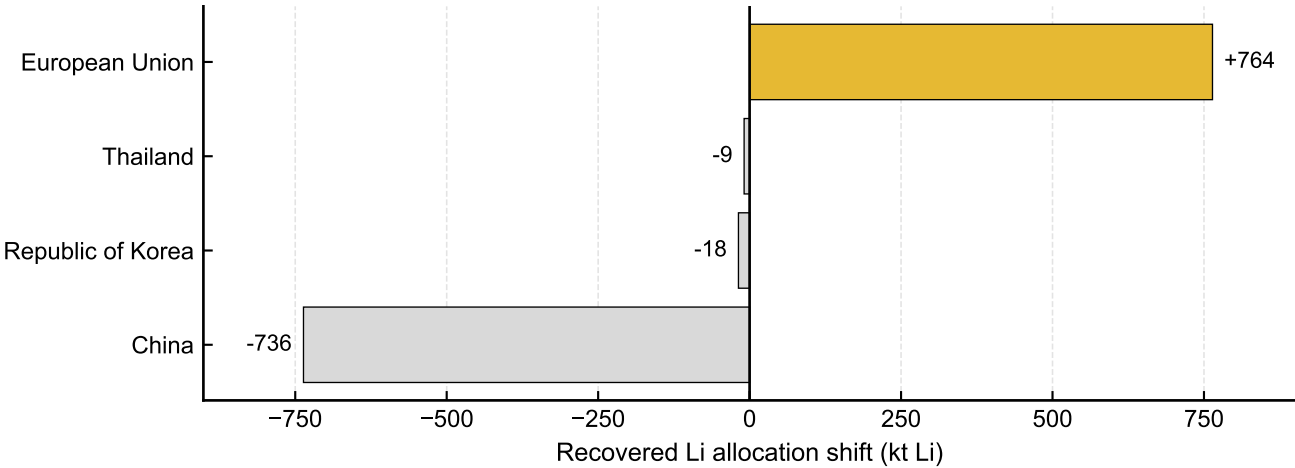

B. Shift from economic choice to Global Li-max

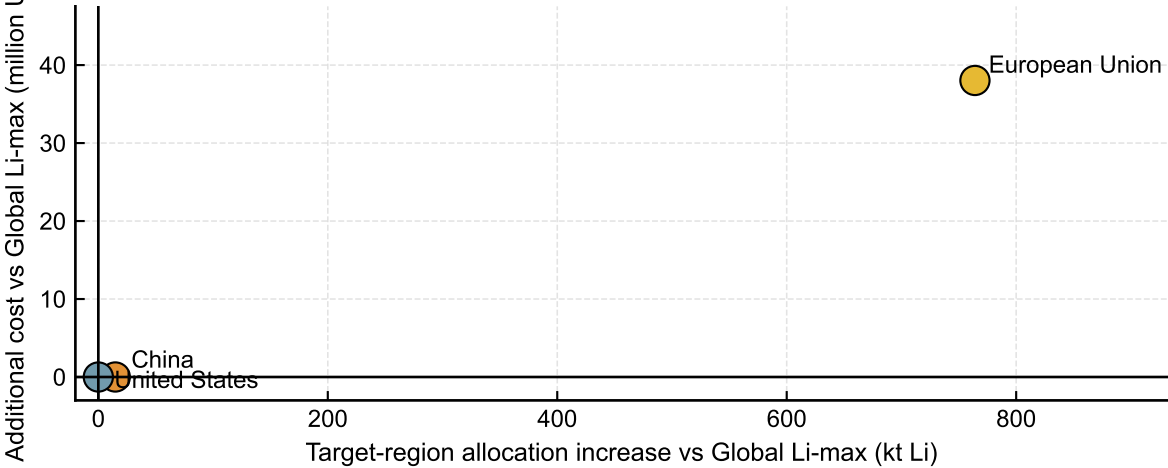

C. China allocation relative to Global Li-max

D. EU allocation relative to Global Li-max

E. Additional regional allocation relative to Global Li-max

2050 reference-policy benchmark. Shifts are decomposed into the resource-efficiency move from economic choice to Global Li-max and the additional regional allocation shifts relative to Global Li-max.
